Education

M. Sc. Tech. in Software Engineering

LUT University

2021-Present

Core Tech Stack

Backend:

- TypeScript
- Node.js
- Express
- Rest APIs

Frontend:

- React
- JavaScript
- Tailwind CSS
- Responsive Design

AI & DevOps:

- Claude Code
- AWS (ECS, S3)
- Docker
- Git & Github
- CI/CD Pipelines

Databases:

- MongoDB Atlas
- SQL

Professional summary

Frontend-focused Full-Stack Developer with proven experience building production-grade React and TypeScript applications from scratch. Combines strong UI/UX sensibility with end-to-end technical ownership — translating complex requirements into responsive component architectures and seamless API integrations. Experienced in AI-assisted development workflows including Claude Code to accelerate design-to-code delivery. Brings a unique blend of self-leadership and collaborative experience, genuinely excited about building AI-native products with meaningful human impact.

Experience

Full-Stack Developer (Sole Developer) | Industrial Service Portal

5/2025 - Present

Designed and developed a comprehensive, production-ready industrial operations and maintenance management system from scratch. Held end-to-end responsibility for the technical architecture, database engineering, and deployment pipeline.

- **Project management:** Independently scoped, prioritized, and delivered the full product roadmap — balancing client requirements, technical constraints, and deadlines without a team.
- **Collaboration & Communication:** Worked directly with end-users and stakeholders to translate operational needs into technical solutions, iterating based on real-world feedback.
- **Problem Solving:** Designed and resolved complex architectural challenges independently, including multi-user data integrity, real-time workflows, and scalable cloud infrastructure.
- **Architecture & Backend:** Built a scalable backend hierarchy and high-performance REST APIs using TypeScript and Node.js.
- **Frontend & UI/UX:** Developed an intuitive, component-based user interface using React and Tailwind CSS to optimize remote management workflows.
- **Cloud & DevOps:** Containerized the system via Docker and deployed it to AWS using Git-driven CI/CD pipelines.

Executive Board Member (International Affairs) | Student Union of LUT

1/2023 - 12/2023

Managed international student affairs and cross-campus relations, acting as a key link between diverse international stakeholders.

- Represented LUT University as a Student Board Representative in the European EULIST University Alliance.
- Managed daily communications, advocacy, and multi-campus initiatives with local authorities and national unions.
- Co-organized large-scale cultural events requiring meticulous resource allocation and agile crisis management under pressure.

Infantry Platoon Leader (Second lieutenant) | Finnish Defence Forces

7/2018 - 6/2019

Completed the nation's premier leadership training program (Reserve Officer School, RUK), focusing on operational planning and crisis management.

- Led, trained, and took full operational responsibility for a reinforcement platoon of over 30 subordinates in high-pressure tactical environments.

Languages

- **Finnish** - Native
